For your convenience, we have coded each class according to our recommended level or participation depending on duration of activity, physical expertise and skill, and physical limitations.

- **“Gentle”, coded G**

Classes for all levels of participants, especially those with arthritis or other joint limitations.

- **“Novice”, coded N**

For the new or recently inactive but experienced athlete with few or limited physical issues. These classes are fairly low impact and easily modified to accommodate joint related problems.

- **“Intermediate” coded I**

Intended for the regular exerciser with few limitations. These classes may include some high impact cardio activities with training levels in the mid aerobic range, moderate level cardio interval sets emphasizing short duration work, and/or heavier weight sets with weight progressions.

- **“Experienced”, coded E**

Designed for the advanced, skilled athlete with few limitations. These classes are intense and may include high impact interval sets; athletic training drills, short duration anaerobic sets, advanced choreography, and progressive muscle overloads.

Aqua Mix: Increase cardiovascular endurance while strengthening and toning your upper and lower body. Each week will be a surprise as the instructor will mix up the workout to keep you motivated and wanting more while at the same time keeping your metabolism guessing what’s next. N, I, E

H2O Express: High impact cardio class that includes some kickboxing moves. I, E

H2O Fitness: Intermediate workout consisting of cardio, suspended core work and toning. N,I

H2O Deep Water: This deep-water aerobic fitness class is designed to offer a total body workout for strength and cardiovascular fitness with minimal impact on the lower body joints. These exercises utilize the use of the aquajogger belts to strengthen muscles and increase cardiovascular endurance. Participants should be comfortable in deep water. Great for all levels of fitness. **G, N**

Aqua Pilates: Aqua-Pilates is a core intensive class aimed at building both strength and flexibility in a low impact environment. Come try this short, but challenging class!
