Smithfield Public Utilities Performing Routine Maintenance on Flowers St. Water Tank

Every two to three years, the Town of Smithfield Public Utilities Department performs routine maintenance on each of our water tanks. The maintenance involves emptying each tank, general inspection of the tank, cleaning, painting and, finally, refilling the tanks. Our employees are currently working through these necessary steps at the Flowers St. water tank in West Smithfield.

During this time, customers could experience intermittent low water pressure. These small pressure drops are normal and a direct result of the maintenance of the water tanks. The work on the Flowers St. water tank should be completed by October 15th.
